10. Group members' individual practice-adoption status	<ul style="list-style-type: none"> ▪ At least 50% group member adopted 2 practice/AH related behaviour * ▪ At least 75% group member adopted 3 practice/AH related behaviour * ▪ At least 75% group members' CHC has been used for at least 3 times ▪ Members' CHC has been used by other service provider other than CARE trained LHW. 	<ul style="list-style-type: none"> ▪ 2.5 ▪ 5 ▪ 2.5 ▪ 2.5 	
Total :		100	

Note of scoring

- The subcategory of maturity areas with (*) Mark shows same performance indicator but with high and low score.
- The subcategory of maturity areas with (**) Mark shows same performance indicator but with high and low score.
- Both * and ** marked subcategory performance indicators in one areas definitely shows more than 10 score. But group members must select their status indicators from each set of performance marked with either * or **. There is no score to select both options marked with * or **.
