QUESTIONS

1. How long did you plan for the market assessments in Brazzaville and in BS?
 - 2 weeks to define the methodology and develop the tools + 2 weeks of field work + 2 weeks of data analysis and reporting.
2. how would you manage vendors business when conducting market assessments??
 - many of the tools that we use, all outlined in the annexes of MERS and MisMA, can address bias and vendors roles in our data collection. MERS also has guidance for this in the Enterprise and Market Systems Development Standards
